VISION:

In an industry of machine specialization, our team knows finished product. It's the **Power of 3** in action, with **wire drawing, stranding/cabling and extrusion** – we build machines for all three processes, whether your product is ferrous or non-ferrous, wire, rope, or cable.

MARKETS:

MFL GROUP takes great pride in providing its customers with complete innovative solutions with products represented by two historic BRANDS: **MARIO FRIGERIO** for the steel wire and rope machinery and **FRIGECO** machinery for the non-ferrous wire and cable industry. Recently MFL Group added **Caballe, OM Lesmo, and Eurodraw Energy** to its list of international brands. MFL GROUP is not just a machine supplier. We continue to diversify with the goal of enhancing our knowledge base pertaining to **PRODUCT:** Machinery for wire drawing, stranding and insulation, **TECHNOLOGY:** ferrous and non-ferrous materials, and **CUSTOMER:** tailoring our products to specific customer product requirements.

HISTORY:

At MFL Group, 100 years of experience enables us to apply the industry's broadest engineering and manufacturing knowledge to the design of drawing, stranding and extrusion machinery for wire, rope and cable production. This experience and technical expertise enables greater customization and optimization of the customers production process.

Founded by Mario Frigerio in 1897, the company is still family owned and today, a fourth generation is involved in the daily operation and are in key management positions.

- 1950, MFL group becomes a world leader in design, manufacture, and marketing of drawing machines for ferrous materials under the Mario Frigerio brand.
- 1998 MFL Group entered the Non-Ferrous wire and cable market under the Frigeco brand.
- 2010 the new production plant in Ascoli Piceno was inaugurated for the engineering and manufacturing of multi-wire drawing lines and extrusion lines.
- 2014 the construction of the new corporate headquarters and main manufacturing facility in Molteno (Italy) was completed.
- 2015 MFL Group acquired the company CM Caballe S.A. and the Intellectual Property of the brands Caballe, OM Lesmo, and Eurodraw Energy to increase its footprint in the non-ferrous market.

Mario Frigerio SpA is certified ISO 90001 and OHSAS 18001 (Health and Safety Management Systems)

CORE COMPETENCE:

Over the last 25 years, the group has made significant investments in developing new products and services, with the aim to offer complete vertically integrated turn-key solutions to the ferrous and non-ferrous wire, rope and cable manufacturers. Each OEM has developed in-house specialized know-how through intense and focused research & development activities in order to supply innovative solutions tailored to the specific customer product requirements as well as classic machines and total systems solutions to react to the rapidly changing market demand. MFL GROUP has built a solid global organization in order to support its strategy. MFL has assembled an after-sales-service department of experienced Ferrous and Non Ferrous wire, wire rope and cable engineers committed to provide timely customer service, technical solutions, and assist our customers in all aspects of the manufacturing process.

MFL Group is the only company that is authorized to provide supply original spare parts for Mario Frigerio, Frigeco, Caballe, OM Lesmo and Eurodraw Energy machines.
